Profile

A dedicated Software Engineering student adept at software development and applying scientific methods to complex problems. Successfully developed and optimized machine learning models, leading to a 15% enhancement in predictive analytical accuracy for data-driven applications. Proficient in machine learning and data science practices, this engineer is driven to deliver efficient and optimized software solutions.

Education

Btech Cse

DAVIET, Jalandhar, Punjab

Aug 2023 – June 2026

CGPA/Percentage: 8.0

Technical Skills

Languages: Python, C++

Frameworks: Streamlit, Tkinter

Tools: Git, VS Code

Projects

CareerCatalyst  | *Transformers, NLP, Python*

09 2024

Engineered CareerCatalyst, an advanced resume builder and ATS compatibility checker application. This solution, developed using **Python**, leverages **NLP** and **Transformers** to analyze resume content, provide actionable feedback, and optimize documents for Applicant Tracking Systems, significantly enhancing user job application success rates.

CERTIFICATIONS

- Mastering DSA

ACHIEVEMENTS

- * Mastered advanced data structures and algorithms by successfully solving over 400 problems on LeetCode.
- * Conducted a comprehensive case study on data science applications in sports, generating insightful analytical findings.
